INTRODUCTION

School districts must account for a variety of revenues from several local, state, and federal sources. Revenues include property taxes, grants, state allocations, fines and fees, and many other types. For governmental fund types, second-class districts primarily account for these revenues on the cash basis, while first class districts must use the modified accrual basis. The accrual basis of recognition is generally used for trust funds.

On the cash basis, revenues are recognized when they are received. On the accrual basis, revenues are recognized when they are both measurable and available. Measurable means that the revenue can be determined or reasonably estimated. For revenue to be available, it must be collectable within the current period or soon enough thereafter to pay liabilities of the current fiscal period.

For districts using the modified accrual basis of revenue recognition, state law considers property taxes receivable unavailable for revenue accrual, RCW 28A.505.010, WAC 392-123-047, RCW 28A.150.400. This is a departure from GAAP as defined by GASBS 33 and Interpretation 5 and should be disclosed in the notes to the financial statements.

Districts preparing GAAP statements prepare the governmental fund financial statements using the modified accrual basis of accounting but use the accrual basis of accounting for the districtwide statements. See Chapters 1 and 3 for a more detailed discussion of accrual accounting.

Sub-Fund Accounting in the General Fund

Effective for the 2018–19 school year, separate accounting of state and local revenues, and local revenues to expenditures is required. Local revenue means enrichment levies collected under RCW 84.52.053, local effort assistance funding received under chapter 28A.500 RCW, and other school district local revenues including, but not limited to, grants, donations, and state and federal payments in lieu of taxes. Local revenue does not include other federal revenues, or local revenues that operate as an offset to the district's basic education allocation under RCW 28A.150.250

School districts are required to deposit local revenues into a sub-fund of the general fund. For the 2018–19 school year, the State Auditor's Office (SAO) review of school district financial statements related to this requirement will be aimed at ensuring school districts have established a local revenue sub-fund.

The complete list of revenue subsidiary accounts for the General Fund are identified by sub-fund in the table below, beginning on page 5-5. These categories are:

School District Revenue: Classified by Category	
CATEGORIES	GENERAL LEDGER ACCOUNT
1000 LOCAL TAXES	960
2000 LOCAL SUPPORT NON-TAX	960
3000 STATE REVENUE—GENERAL PURPOSE	960
4000 STATE REVENUE—SPECIAL PURPOSE	960
5000 FEDERAL REVENUE—GENERAL PURPOSE	960
6000 FEDERAL REVENUE—SPECIAL PURPOSE	960
7000 OTHER SCHOOL DISTRICTS	960
8000 OTHER ENTITIES	960
9000 OTHER FINANCING SOURCES	965

In all funds, except for the Associated Student Body Fund and the trust funds, these categories are further divided into specific revenue or other financing source accounts. The subsidiary revenue or other financing source account numbers, titles, and descriptions are uniform for all applicable funds; however, not all accounts are used in each fund. For state reporting purposes, each account is assigned a four-digit revenue account number. The first two digits represent the source of the revenue or other financing source and the last two digits indicate the use of the revenue, if assigned. For example: for Revenue Account 6151 ESEA Disadvantaged—Federal, Title I, Part A, the first digit indicates the source of the revenue as Source 6 Federal Revenue, Special Purpose. The last two digits identify the related program expenditure Account 51 ESEA Disadvantaged—Federal.

Theoretically, it would be possible to use the term *revenues* to describe all inflows of current financial resources in governmental funds. As a practical matter, however, financial statements for governmental funds traditionally have distinguished two categories of resource inflow: *revenues* and *other financing sources*. This latter category has been used to isolate certain non-routine inflows that might otherwise distort the analysis of revenue trends.

Subsidiary accounts in revenue categories 1000 through 8000 listed above are summarized in General Ledger Account 960 Revenues and controlled by establishing

estimates in Account 510 Estimated Revenues. Revenue category 9000 is summarized in General Ledger Account 965 Other Financing Sources and is controlled by establishing estimates in General Ledger Account 515 Estimated Other Financing Sources.

In the Associated Student Body Fund, the source of all revenues is revenue category 2000 Local Non-tax. Financial transactions in the Associated Student Body Fund are further classified into general activities for both revenues and expenditures as follows:

- 100(0) General Student Body
- 200(0) Athletics
- 300(0) Classes
- 400(0) Clubs
- 500(0) (Unassigned)
- 600(0) Private Moneys

Note: See Chapter 12 – Associated Student Body Fund Accounting for more detail of proper classification of ASB activities.

The following pages contain a complete list of the subsidiary accounts for the General Fund, Capital Projects Fund, Debt Service Fund, and Transportation Vehicle Fund as of the printing of this manual. Districts should update their manuals as changes occur to ensure use of the applicable accounts. The list of subsidiary revenue accounts is in account number sequence and indicates the funds in which these account numbers can be used. A description of the revenue accounts and references, where appropriate, follow the list.

For Private-Purpose Trust Funds, each individual trust shall be assigned a unique identifying number to be used to record revenues and expenses for the individual trust.

Numbering series are assigned as follows:

- 100(0) Series: Scholarships
- 200(0) Series: Student Aid
- 300(0) Series: Other

CODING OF REVENUES AND OTHER FINANCING SOURCES

Revenues and Other Financing Sources are structured by the source of the funds.

- 1000 Local Taxes
- 2000 Local Support Non-Tax
- 3000 State Revenue—General Purpose
- 4000 State Revenue—Special Purpose
- 5000 Federal Revenue—General Purpose
- 6000 Federal Revenue—Special Purpose
- 7000 Other School Districts
- 8000 Other Entities
- 9000 Other Financing Sources

Within each of the general categories above, the second digit may further designate the revenue source, as in the 4000 and 6000 series. See notes preceding these sections. The last two digits signify the program for which the revenue is designated. Accounts ending in 00 contain the revenues for which individual program codes have not been established and for which OSPI does not require individual breakouts. Districts add additional coding to keep individual revenues segregated for program, budget, and audit requirements.

*For example, for revenue code **6124**:*

- 6** Indicates Federal Revenue—Special Purpose.
- 1** Indicates revenues that come to the district through OSPI.
- 24** Indicates the program; in this case, Special Education—Supplemental.

Deductible Revenues

The following General Fund revenues of the school district reduce the state payment to the district in Revenue 3100 Apportionment. Resources received for these accounts in the debt service, capital project, and transportation vehicle funds are not deductible revenues.

- 1400 Local in Lieu of Taxes
- 5400 Federal in Lieu of Taxes

After receipting the revenues, districts should compare what they receive to what is deducted on apportionment to determine if it is appropriate to record a liability in General Ledger 630 Due to Other Government Units.

The Catalog of Federal Domestic Assistance is the basic reference source of federal programs. CFDA numbers are generally five digits with a period between the second and third digits. The first two digits are assigned to the federal awarding agency (e.g., 10.550 is Food Distribution under the National School Lunch Act).

Every effort should be made to obtain the CFDA number for each program for which federal assistance is received. It is best to obtain this information when the contract or agreement is entered into. The catalog of Federal Domestic Assistance is available online at [Assistance Listings](#).

If a program has no identifying number, the first two digits of the assigned two-digit agency number should be used to indicate the federal agency that provided the award. After these digits a period should be placed and the word "unknown" written.

Example: "10.unknown" or "10.999" indicate a program from the Department of Agriculture for which the CFDA number could not be obtained.

Selected two-digit agency numbers are listed here as a reference:
